# Meeting guidelines

- All microphones are automatically set to “MUTE”.
- All cameras are automatically set to “OFF”.
- To comment or pose a question you can either
  - Write in the “CHAT” window.
  - Use the “RAISE-HAND” feature in MS Teams. Your microphone and camera will be available to use accordingly.
- When speaking, please
  - Turn you microphone and camera “ON”
  - Start by identifying yourself.
  - Remember to turn your camera and microphone “OFF” afterwards.

In order to ensure technical quality in the meeting we ask all attendees to adhere to the meeting guidelines.

## Feedback regarding this meeting

- Questions and comments will be noted during the meeting
- Answers will be provided during the meeting if possible
- Answers to remaining questions and comments will be provided “to all” after the meeting
- Please note! Questions and answers within the scope of the upcoming consultation, will be answered as a part of the feedback on the consultation

If you have questions or comments after this meeting, please e-mail them to [ccm@nordic-rsc.net](mailto:ccm@nordic-rsc.net).

# Agenda

09:00 – 09:10	Welcome and opening words
09:10 – 09:25	Status update of internal parallel run  Flow-based capacity calculation, pre-coupling Socio-economic welfare analysis, post-coupling
09:25 – 10:05	Relation between NTC and FB
10:05 – 10:15	Break
10:15 – 11:00	ATC extraction for Intraday gate-opening
11:00 – 11:10	Break
11:10 – 11:20	Upcoming consultation
11:20 – 11:50	Discussion
11:50 – 12:00	Closing remarks

# Reasons and objectives of the workshop

- To elaborate the capacity calculation method for the Intraday market at its gate-opening, being the ATC extraction (ATCE) method for the stakeholders
- To inform the stakeholders about the status of the ATCE development and implementation
- To invite the stakeholders to provide comments that will be duly considered in the development work

# Update of the external parallel run timeline

- The start of external parallel run in November 2021 is not feasible.
- Instead, the external parallel run is expected to start early 2022, and the Nordic CCM project will come back to the stakeholders with a more detailed timeline in the coming weeks.
- The reason for the delay is that ensuring sufficient quality of the input data and the validation of the capacity calculation results have taken longer than anticipated.
