

Welcome and opening words

Nordic CCM Stakeholder Meeting
December 16, 2021

Ulrik Møller

ulm@energinet.dk

Meeting guidelines

- All microphones are automatically set to “MUTE”.
- All cameras are automatically set to “OFF”.
- To comment or pose a question you can either
 - Write in the “CHAT” window.
 - Use the “RAISE-HAND” feature in MS Teams. Your microphone and camera will be available to use accordingly.
- When speaking, please
 - Turn you microphone and camera “ON”
 - Start by identifying yourself.
 - Remember to turn your camera and microphone “OFF” afterwards.

In order to ensure technical quality in the meeting we ask all attendees to adhere to the meeting guidelines.

Please provide feedback!

During the meeting

- Questions and comments will be noted during the meeting and answers provided directly if possible
- Answers to remaining questions and comments will be provided “to all” after the meeting

Web survey for feedback on the event

- Provide general feedback regarding this stakeholder event by answering our **short** web survey: <https://esmaker.net/nx2/s.aspx?id=cc02f457c14a>

Questions or comments after the meeting

- E-mail us at ccm@nordic-rsc.net

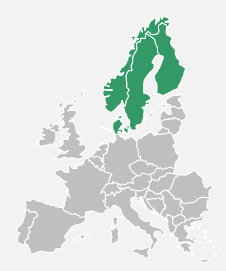

Stakeholder feedback on the previous SH event (November 4)

- 26 participants in the webinar
- One stakeholder provided feedback via the web survey
- According to feedback received, the content and duration of the stakeholder event (~2 hours) is **okay and fair**

TSO response

The stakeholder event today is designed to follow the feedback received.

Stakeholder feedback: overview of ATC extraction method consultation outcome

- 3 stakeholders provided feedback
- The stakeholders indicate difficulties of evaluating the ATC extraction method itself and its impact without the actual results
- The TSOs are asked to further elaborate on
 - the relationship among the ATC extraction method, (non-)intuitive flows and overloads
 - the relationship between the ATC extraction method and 70% rule
 - the formulation of the objective function

TSO response

- The CCM project will share the ATCE results obtained during the external parallel run with the stakeholders and will keep the stakeholders posted on the optimization algorithm and its parameters
- The methodological questions will be addressed in the updated ATCE document, as well as on the CCM project website, after the ATCE results are available

Agenda

- 09:00 – 09:15 Welcome and opening words
- 09:15 – 09:30 Status update of internal parallel run
- 09:30 – 10:15 Preliminary observations based on Flow-Based market simulations
- 10:15 – 10:30 Any other business and closing remarks

Status of the external parallel run

The Nordic CCM project expects to start the external parallel run period in March 2022
